

BLOCKINTEROP

DECENTRALIZING ANCILLARY HEALTHCARE SYSTEMS

Problem

- 
- Lack of immediate access to (Electronic Medical Records) EMR's causes delays in patient care
 - Current EMR's are siloed and private patient data is not completely secure
 - Currently there is no easy way to address these challenges for clinicians and patients

Solution

BlockInterop is creating interoperability applications that will be utilized across healthcare ecosystems to provide immediate access to electronic records and efficiencies for both patients and providers, thus enhancing the patient experience

Eliminate data silos
-create a decentralized healthcare ecosystem

Improve efficiency
-streamline the supply chain

Enhance security
-implement encryption and cryptology

Market Segments

Our Target Markets Are:

- Clinicians
- Medical Labs
- Hospitals
- Pharmacies
- Patients
- Affiliates (Mobile Wearables)

Competitive Advantage

BlockInterop has the following advantages over EMR Systems

Immediate Access
for patients to their medical
records

Eliminates Time Delays
in retrieving medical records

Supply Chain Cost
reduction for medical providers

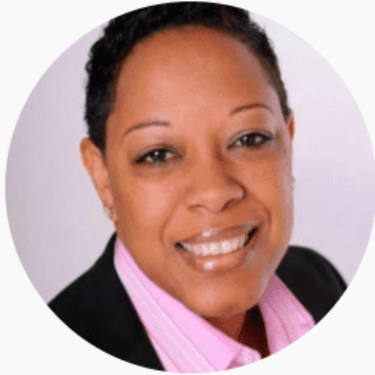

Insurance & pharmaceutical
fraud eliminated

Management Team
comprised of healthcare &
technology experts

Executive Team

**N. Gina Malak, Co-Founder,
CEO/CTO,**

- Certified Interoperability Professional
- Healthcare Engineer and Project Manager in the industry
- Over 20 years' experience
- Master's in Information Technology Management.

**Charon C. Collier,
Co-Founder COO/President**

- Certified Coding Associate
- Health IT Professional
- Over 20 years' experience
- Expertise in helping organizations and teams transition electronic Health Record (EHR)
- Licensed Life Insurance Agent

**Anthony T. Farrar ("Tony")
CFO, CLU, ChFC**

- CEO of Farrar Financial Group
- Senior executive with 28 years of corporate and business experience
- Bachelor Degree in Accounting
- Served as Life and Securities Representative with Prudential Insurance

Press Releases

“ Our Blockchain solutions will lay the ground-work for the decentralization of electronic health records

The App

“ BlockInterop Solutions will transform healthcare enterprises and increase quality of care by enabling new ecosystems.
